About Us

Asher Vinberg, the owner of Ninja Movers since 2008, began his career in the mid 1990s as a mover for New York City's biggest and most famous moving company. As he rose through the ranks, he became the requested mover to New York's elite. He was eventually promoted to operations' manager, where he oversaw 1,000 moves each year and 100s of movers.

Even with his successes, something was absent. He missed the one on one interactions he used to have with customers and he wanted to use his knowledge to start something of his own. That's when Ninja Movers was born.

He named the company "Ninja Movers" after a ninja's flawless precision. He committed himself to make Ninja Movers the nation's faster, cleaner, sharper mover. Your move will be seamless, as if you were moved by a ninja.

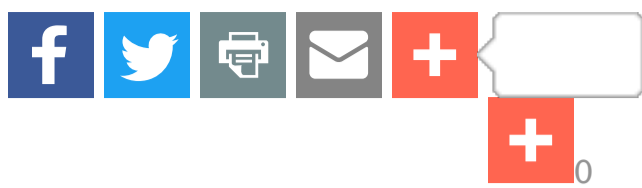

He passed his extensive training and logistical knowledge on to his staff and moving crews, but he insists on staying involved in every single move. He personally meets each and every customer. He guarantees his pricing. He is available to customers even when the move is over.

Whether you're moving locally or long distance, Ninja Movers will be the mover you'll call on again and again. Asher will make sure of it.
